

Day Science/Night Science

In Day Science/Night Science otherwise disparate narratives become condensed and intertwined in an installation by Nikki Pugh at the Net Shape Building, Interdisciplinary Research Centre, University of Birmingham.

A French microbiologist researches how cells respond to their external conditions; a cognitive scientist explores creativity within art and within science; a graduate of Materials Engineering studies art; an artist struggles to choose a path forward...

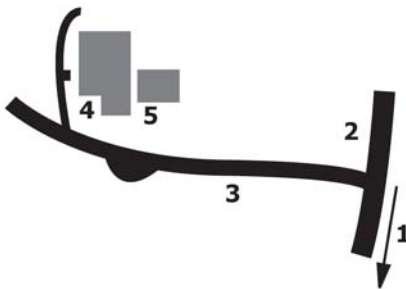

You are invited to join us for the preview as night falls on Tuesday 13th of June, 8-10pm.

Day Science/Night Science will then remain viewable by the public, day and night, until 3rd of July.
